Dari www.TerapiMusik.com

Apa itu Rife Frequency Therapy?

Rife Frequency Therapy adalah metode penyembuhan dengan mendengarkan bunyi dengan frekuensi tertentu yang disesuaikan dengan jenis penyakit. Terapi ini terbukti bisa membantu menyembuhkan berbagai penyakit dengan cara mematikan virus, bakteri patogen dan sel kanker.

Kami mempelajari penelitian dan pengalaman dr. Raymond Royal Rife yang menemukan "Rife Machine", sebuah mesin penghasil suara berfrekuensi khusus untuk menyembuhkan penyakit tertentu. Menurut pengalaman para penggunanya, Rife Machine bisa membantu penyembuhan penyakit ringan seperti batuk dan pilek sampai penyakit berat seperti kanker dan hepatitis.

Sayangnya tidak semua orang mampu membayar harga "Rife Machine" yang cukup mahal, yaitu mencapai empat puluh juta rupiah per mesin. Untuk itu, sebagai solusinya kami menghadirkan *CD Audio Rife Frequency Therapy* yang sangat terjangkau. CD Audio ini berisi bunyi dengan frekuensi yang disesuaikan dengan penyakit yang Anda derita.

Rife Frequency Therapy berbeda dengan Terapi Musik dan Terapi Gelombang Otak, meskipun sama-sama menggunakan frekuensi untuk penyembuhan. Tujuan Terapi Musik dan Terapi Gelombang Otak adalah menstimulasi otak agar menghasilkan gelombang berfrekuensi tertentu, sedangkan Rife Frequency Therapy bertujuan untuk "menyerang" virus/bakteri agar mati atau melemah dengan frekuensi tertentu.

Cara penggunaan *CD Audio Rife Frequency Therapy* ini sangat mudah, yaitu diputar dan didengarkan sambil santai, waktu istirahat atau sambil tidur di malam hari. CD Audio ini bisa diputar dengan komputer atau MP3 Player yang terhubung dengan speaker (pengeras suara) yang stereo. Semua komputer, laptop atau MP3 Player yang berkualitas baik serta speaker stereo pada umumnya sudah memenuhi syarat. Namun jika Anda ragu apakah peralatan yang Anda punya cocok untuk memutar *CD Audio Rife Frequency Therapy*, maka Anda bisa membeli MP3 Player dan Speaker yang kami sediakan.

Rife Frequency Therapy sudah lama di gunakan sebagai terapi alternatif atau terapi pendukung pengobatan medis dan terbukti sangat aman. Metode terapi ini sama sekali tidak berbahaya, tidak menyakitkan dan mudah dilakukan siapa saja. Anda tinggal memesan CD Audio Rife Frequency Therapy dan memutarinya di rumah setiap hari.

Sejarah Dr. Raymond Royal Rife

Rife Frequency Therapy diilhami oleh penelitian dan pengalaman Dr. Raymond Royal Rife ((May 16, 1888 – August 5, 1971), seorang ilmuwan dan peneliti dari Amerika. Pada tahun 1920 Dr. Raymond Royal Rife memulai karyanya mempelajari tuberkulosis secara mendalam dan akhirnya mengembangkan sebuah mikroskop yang canggih sehingga dia bisa melihat mikroba dengan jelas. Dia kemudian menemukan bahwa gelombang osilator frekuensi tertentu, yang disebut "Mortal Oscillatory Rate" atau "MOR" mampu menghancurkan tuberkulosis dan basil tifus.

MOR adalah sebuah frekuensi electromagnetic tertentu yang berguna untuk mematikan virus atau bakteri tertentu, tapi tidak merusak sel tubuh. Setiap virus, bakteri dan penyakit punya MOR yang berbeda-beda. Penemuan Dr. Rife ini merupakan variasi dari teknik yang dipelopori oleh Dr. Albert Abrams.

Penelitian selanjutnya membantunya menentukan MOR untuk e. coli, tetanus, cacar air, herpes simpleks, cacing pin, streptothrix (jamur), rabies dan masih banyak lagi. Sejak saat itu, sekitar 600 bakteri dan virus lainnya sudah ditemukan MOR-nya.

Penerapan frekuensi electromagnetic ke tubuh manusia telah disetujui oleh FDA untuk menghilangkan rasa sakit selama lebih dari 30 tahun (sebagai "TENS" unit dan USG), sehingga telah diuji pada manusia selama bertahun-tahun dan terbukti aman. Selanjutnya, Dr. Rife memulai menanamkan sel kanker dan tumor pada hewan. Setelah kanker dan tumor tersebut tumbuh, Dr. Rife menerapkan mencoba berbagai frekuensi gelombang untuk menyusut dan menghancurkan tumor serta kanker, sampai akhirnya menemukan MOR yang tepat untuk sel kanker dan tumor.

Dr. Rife mengulangi tes-nya beberapa kali sebelum pengujian pada manusia. Pada 1934, ia membuka klinik dan pengalaman pertamanya adalah 16 pasien kanker yang semuanya sudah stadium lanjut. Sebuah komite penelitian khusus yang dipimpin oleh Dr Milbank Johnson telah mengawasi penelitian dan memverifikasi hasil luar biasa yang dilakukan Dr. Rife. Disebutkan bahwa 14 dari 16 pasien tersebut mengalami penyembuhan sempurna dari kanker mereka dalam 3 bulan dan dua lainnya sembuh setelah lebih dari 3 bulan.

Banyak dokter kemudian menggunakan "Rife Machine" (mesin penghasil gelombang suara) dan mereka mencapai hasil yang gemilang dalam menyembuhkan penyakit infeksi atau penyakit yang disebabkan serangan virus maupun bakteri pada tubuh manusia. Namun karena sebab politik (ada yang menyebutkan karena ada kalangan pengusaha yang takut hancurnya

bisnis obat yang menghasilkan milyaran dolar di Amerika), maka peralatan dan jurnal-jurnal tentang Rife Frequency Therapy disita dan dihancurkan oleh lembaga pemerintah waktu itu.

Keseluruhan cerita tentang Raymond Royal Rife terlalu panjang untuk membaca di sini, tapi bisa membaca cerita dan hasil kerja Raymond Royal Rife semasa hidupnya di www.rife.org. Situs tersebut dikelola oleh para pecinta dan penerus metode penyembuhan ala Dr. Rife. Disebutkan juga bahwa banyak karya Rife itu hilang, karena tidak terorganisir dengan baik atau disita dan dihancurkan oleh pihak pemerintah semasa Rife hidup.

Penyakit Apa Saja Yang Bisa Dibantu Dengan Metode Rife Frequency Therapy?

Dr. Raymond Royal Rife dan para peneliti yang mengikuti jejaknya, telah menemukan frekuensi yang cocok untuk mematikan/melemahkan ratusan virus dan bakteri penyebab penyakit. Hampir semua penyakit infeksi (penyakit yang disebabkan oleh virus atau bakteri) yang dikenal luas bisa dibantu dengan metode Rife Frequency Therapy.

Nama-nama penyakit yang disebabkan oleh virus atau bakteri antara lain: Anthrax, Batuk rejan, Cacar Air, Campak, Chikungunya, Demam Berdarah, Berbagai Jenis Penyakit Kulit, Diare, Disentri Amuba, Gonorrhea, Hepatitis A, Hepatitis B, Hepatitis C, Herpes, IBS, Impetigo, Influenza, Kolera, Kondiloma Akuminala, Kurap, Kutu, Lepra, Malaria, Polio, Rabies, Rubella, Sifilis, Skabies / Kudis, Tetanus, Tuberculosis, Ulkus Mole dan lain sebagainya.

Daftar lengkap nama penyakit, nama virus, nama bakteri dan frekuensi yang cocok untuk mematikan/melemahkannya (disebut juga MOR atau Mortal Oscillatory Rate) ada dalam daftar di bawah ini. Masih dalam bahasa Inggris karena kami belum sempat menerjemahkannya. Jika Anda kesulitan memahami bahasa Inggris, Anda bisa bertanya kepada kami apakah penyakit yang Anda alami bisa dibantu dengan metode Rife Frequency Therapy.

The Non-Consolidated Frequency List

NCFL, v2007-05-16

The Non-Consolidated Frequency List, or NCFL, is a compilation of frequency lists from many different sources. Some sets are excluded from this compilation such as the Keelynet and Crane lists which merely specify for almost every ailment the general frequencies of 728, 784/787, 880, 5000, 10000, 800, 20. These frequencies are important and many people run them with every set as an adjunct.

The NCFL contains some frequencies and other information not included in the CAFL, including empirical muscle frequencies, mineral and metal frequencies, Hulda Clark's original frequencies converted into audio range, frequencies of musical notes, and lists of "codes" for function generators which hide the frequencies from the user.

Mid 1990's Rife Researchers' List

The following was posted by an anonymous contributor to one of the early rife lists and is a compilation of what James Bare, Don Tunney, and Hulda Clark were using in the mid 1990's. The following is the verbatim introduction: "Here is a list that I've compiled. The format is frequency, what it supposedly affects, device, source. If the 'device' field says 'theory' it means that someone said this might work, but no-one has actually said anywhere that they've used it. If the 'device' field says 'theory/440' then I took the frequency from Hulda Clark's book "The Cure For All Diseases" and divided by 440."

MORs (Mortal Oscillatory Rates) - This short list includes Rife's original frequencies that he used during several different time periods of his life as well as 1950s era Crane frequencies and Oxyrife's modern frequencies. Crane frequencies are square wave, Rife's and Oxyrife's are sine wave. For Pre 1935, Rife's frequencies are provided in both frequency (hertz) and wavelength of super regeneration (meters), and then the wavelength converted to frequency.

CHEMICAL COMPOSITION OF THE HUMAN BODY

The Larmour frequencies @ 2.3488 Teslas. The frequencies at 500 and 539 milligauss were calculated based upon changes in magnetic flux density. When a number appears before the atomic symbol, it represents the approximate atomic weight.

Notes:

1. Frequency codes 14, 16, 17, 20 and 28 affect more microbes and conditions than all other frequencies combined.
2. The second most effective group of frequencies is; 29, 42, 45, 48, 58 and 86. These are mainly used for parasites and amoebae.
3. Frequencies in the range of 11 to 29 produce the most rapid response, usually within 6 hours.
4. Frequencies in the range of 60 to 85 are those that seem to occur naturally in the brain. It is thought that behaviour can be influenced with harmonics of those same frequencies during behaviour of the opposite type. For example, to reduce/eliminate anger, one would apply a freq. of 6.3 Hz (code# 71). See comments for those ranges.
5. Any good quality square-wave generator, such as those recommended for use with the James Bare Rife Device, should be able to output most or all of the Actual Frequencies listed in this document.

Following is the frequency set, in Atelier Robin function generator format, for *Fur Elise* to be "played" on a plasma tube device that can be heard when operating in the 1000-3000Hz range. It

starts with the first note for an additional 10 seconds to allow a short time for the device to be tuned when it is first started. It ends with 3 minutes of 1760Hz making the total time 212 seconds.

Hulda Clark Frequencies

Hulda Clark frequencies, as published in her books such as *The Cure for all Diseases*, are all above audio range - from 71KHz to above 1MHz. They are specified by her to be run on a sine wave frequency generator. Plasma tube devices like Rife-Bare or EMEM cannot run these frequencies directly. One way to convert the frequencies for use on an audio range function generator is to repeatedly divide by two until they are in range. Another method, reported by Jeff Sutherland to be more reliable, is called Scalar Harmonics. This is to divide the frequency by e raised to the 3rd or 6th power where e equals the natural logarithm constant, also known as Euler's Constant, 2.71828183. The following list uses e raised to the 6th power (S6) to perform the calculation since all the results are below 10KHz. Clark's frequencies are typically provided as a range (high and low) plus a "use" frequency in between which is specified by her to be the most effective.

On pathogen names appended with _1, _2, _3, etc, Clark provides more than one "use" frequency and all of these should be used. Sets annotated with 2nd, 3rd, 4th, etc, indicate she found more than one range for the pathogen. This list is provided on the Electroherbalism website where the S3 scalar harmonic frequencies are also included.

Tapeworm Frequencies. Tapeworms are segmented. The first segment is the head, called the scolex. Tapeworms grow by adding a new segment to their body. Tapeworms can have very large bandwidths (range of frequencies), and it varies by the length of the specimen! It is as if each new segment has a unique, and slightly lower, frequency. Do not use a frequency generator to kill tapeworms. If you accidentally kill middle segments instead of working your way up from the bottom, you may conceivably promote dispersion! Use only a zapper. (Editor's Note: By this, Clark means to use only a device producing a pulsed DC square wave (not an AC sine wave) output. It should be fine to use a square wave generator sweeping the lower to upper range)

The following list was researched by Dr. Toshihiko Yayama in Japan. He used the F-Scan with reagents and patients with known metal poisoning.

Frequencies have been rounded to the nearest 100 Hz. To test for metals, a DIRP is done from 30,000-60,000 Hz in 100 Hz steps. The mercury frequency has been confirmed by others. These frequencies are intended for research in detecting the presence of metals. They are not intended for use as treatment. Treatment should include chlorella and other materials as needed.
